

## 07. Administrators & Management Rights

ADMINISTRATORS.....	1
ADMINISTRATOR PRIVILEGES .....	2
LOGIN INTERFACE .....	3
CONTROL PANEL .....	4

18 System has powerful access control mechanism over administrators on what they can do and what they can't. System also keeps records of these administrators' activities so that someone could always be found to be responsible for possible accidents

## ADMINISTRATORS

The screenshot displays the i8 Control Panel interface in Microsoft Internet Explorer. The main window shows the 'Administrator' management page with a table of administrators. A red box highlights the 'Administrator' menu item in the left sidebar. A red arrow points from this menu item to the 'Activities' window below. Another red arrow points from the 'Menu' column in the administrator table to the 'Activities' window. The 'Activities' window shows a log of actions performed by the 'admin' user.

Name	Login Id	Password	Email	Activities	Access Rights	Enabled	Delete
i8.Admin	admin	xxip-admin	phentony@alpaq.com	Q	Menu Business	<input checked="" type="checkbox"/>	
test	test	test	test@test.com	Q	Q	<input checked="" type="checkbox"/>	X

**LOC : User Management > Administrators ...**  
 System administrators are people who are assigned by the **admin** (The default administrator) to have the right to manage system properties as well as business functions and states.

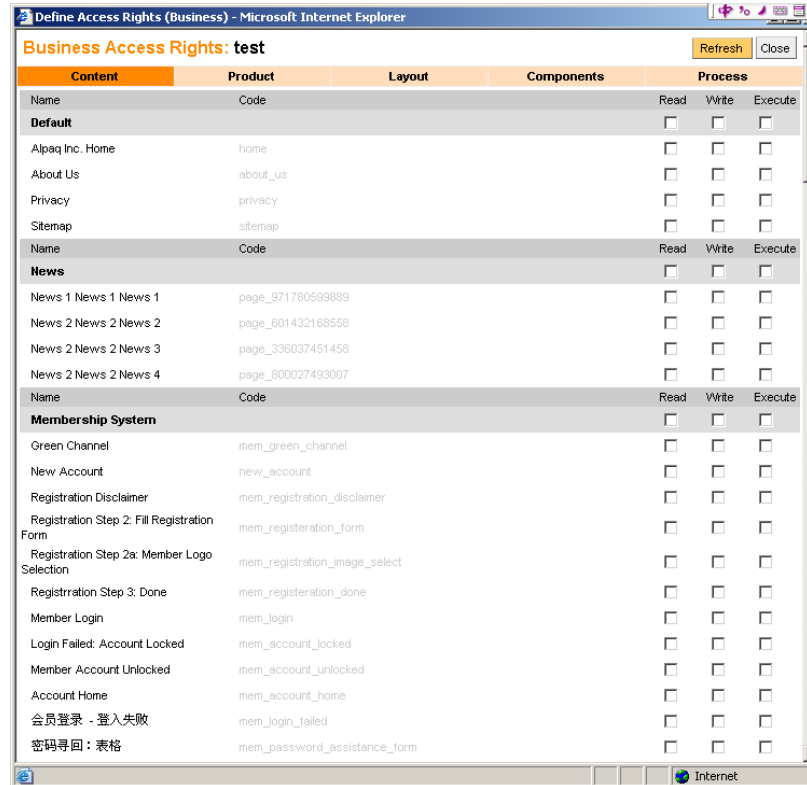

- **Name:** Administrator Name
- **Login ID:** ID for administrator to login
- **Password:** Login password
- **Email:** Email of administrator
- **Activities:** Activity log for administrators<sup>1</sup>
- **Access rights:** Controls the access rights of administrator (Menu rights are the right to use some particular links, business rights are the rights that the administrator to manipulate a particular part of the system, such as the read, write and execute permissions on managing product categories)  
 Default account "admin" has all the rights
- **Enabled:** Enable/Disable administrator, only enabled administrators can login
- **Delete:** Delete administrator

<sup>1</sup> Activity logs are used as evidence when needed

## ADMINISTRATOR PRIVILEGES

Menu Access Rights

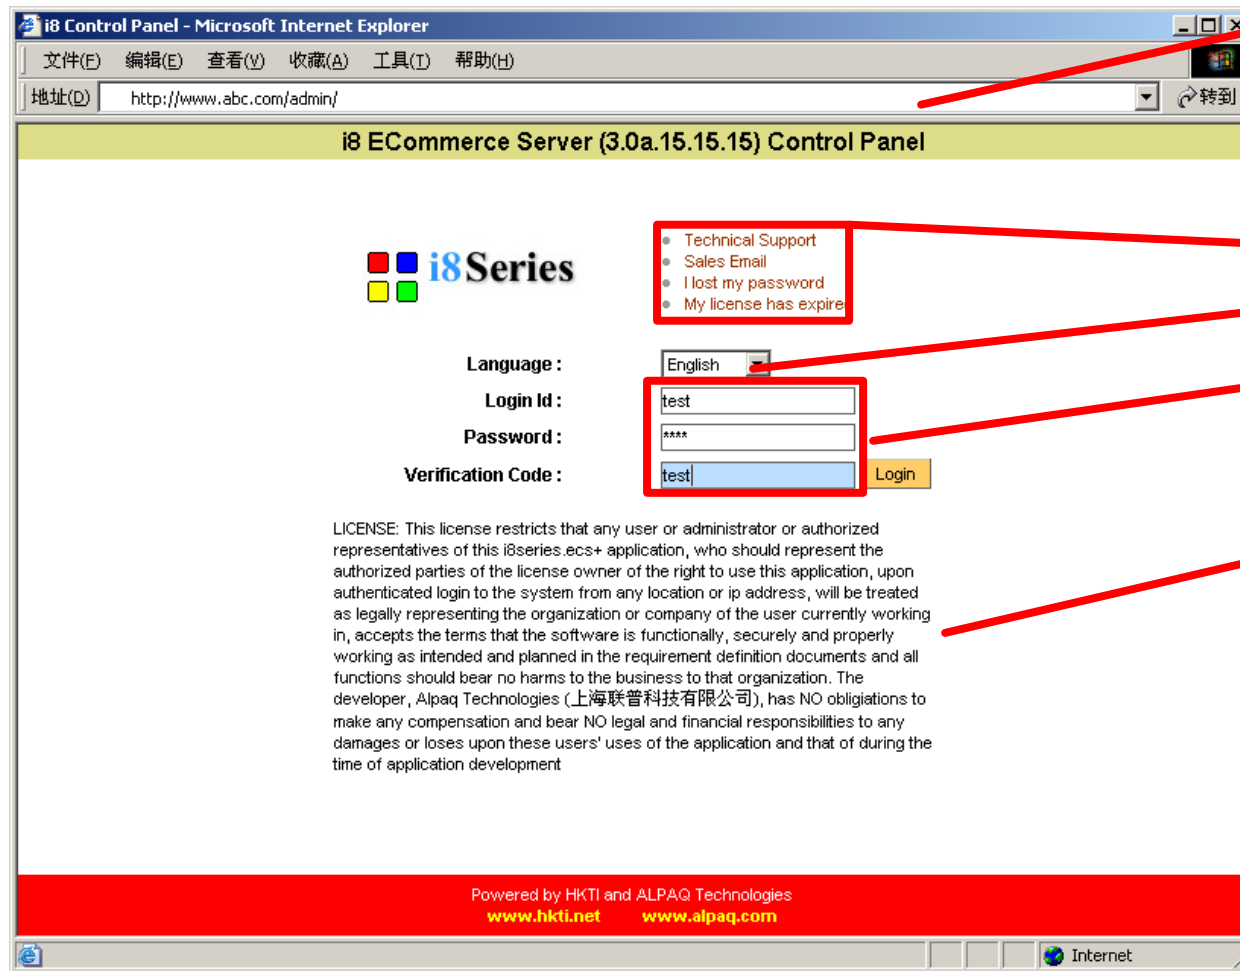

Content Management Rights

**LOC: : User Management > Administrators ...**  
 Except the default administrator account of ID: **admin**, all other administrator accounts are restricted by access rights

Currently, most i8 platforms have already adopted the menu access right control function while some big applications derived from i8 platforms adopt business access rights control mechanism (Read, write, execute)

## LOGIN INTERFACE

Your system administration login URL is:  
[www.yourdomain.com/admin/](http://www.yourdomain.com/admin/)  
(For example, your website is at: [www.abc.com](http://www.abc.com/), then your admin URL is [www.abc.com/admin](http://www.abc.com/admin/))

On the left is the login page

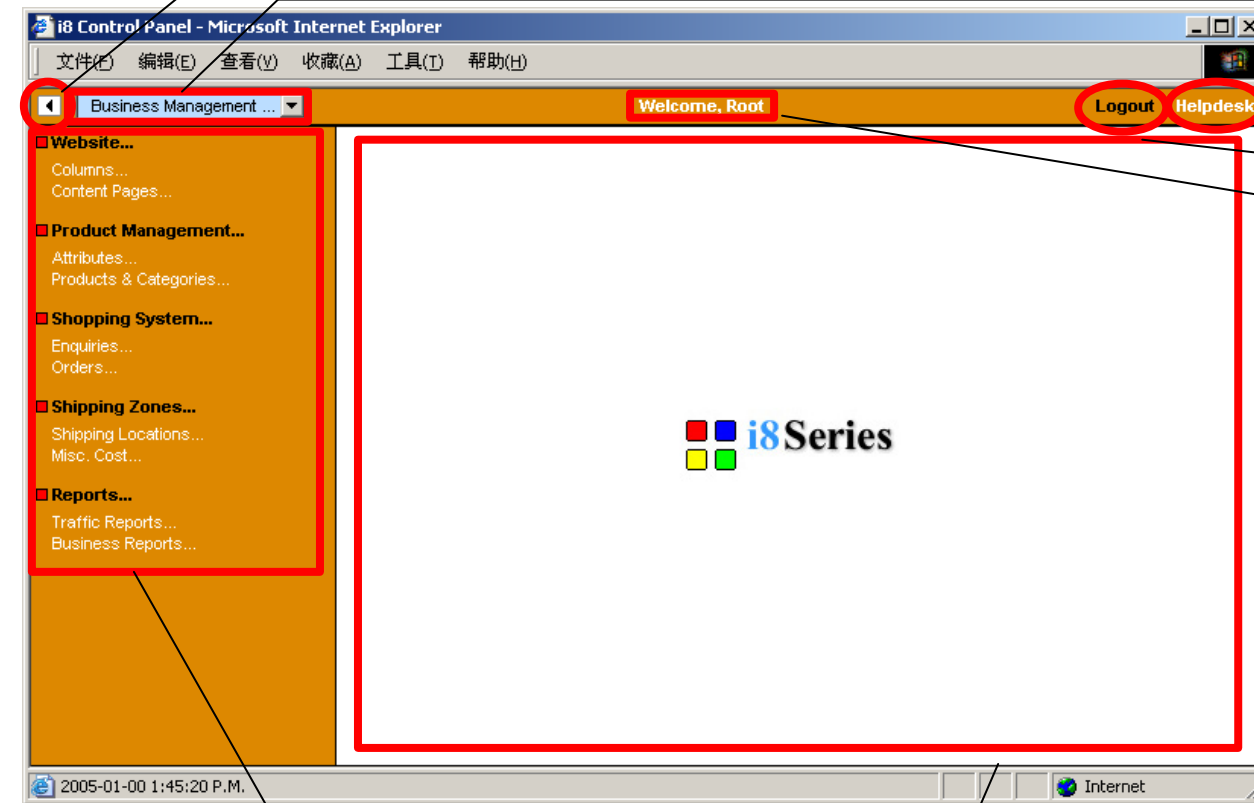

Support emails

Language switching menu

Login entry form (Login ID, password and verification code). The verification code is any code assigned by you, which will be checked by our system for security purpose

License by Service provider

## CONTROL PANEL

Control Panel & Menu Items  
(Links in black text are usually general settings of functional groups)

Main Panel

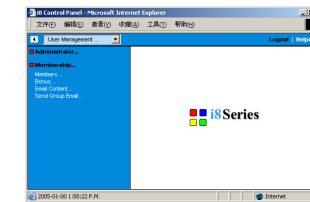

Menu Panel Expanding/Collapsing

Menu Switching (Business management, user management, exchange & system configuration)
