

## 13. Comment Management

COMMENT LIST ..... 1

Some i8 systems have comment function for products and pages so that administrator can gather more useful information from visitors. To prevent visitors from propagating news against your business, comments can be managed from the backend (Status update)

## COMMENT LIST

LOC : Exchange > Comments ...

On the left shows the comments by visitors

Page Navigation

- **Date:** The date the comment is made (With IP)
- **Respiratory:** Where the comment occurs (Products or pages)
- **Content:** Name of visitor and comment detail
- **Delete:** Set the status so the comment cannot be viewed in front end (It is not an actual delete, all comments are still kept in database)
